## PROFILE

Enthusiastic front-end developer eager to leverage my unique blend of professional experience and fervor for web development in a dynamic team environment with a frontend role. Over the last decade, my career progression from an Accountant to a Finance Director has equipped me with a rich skill set that I have adeptly utilized to accomplish my goals successfully.

Currently, I am expanding my skill set into the React ecosystem, having completed few training projects. I am keen to leverage my skills and learn in a dynamic team and seeking opportunities that will allow me to contribute and further develop my abilities in React-based projects.

I pride myself on being a responsible individual with a rapid learning curve and an exceptional eye for detail. I value open communication and thrive in environments that foster support and growth. My goal is to join a forward-thinking team where I can contribute to innovative projects, share my diverse experiences, and continue my development as a front-end developer.

## PROJECTS

### LIST OF ROBOTS

## EXPERIENCE

2022-RECENT

### SCREENING EAGLE

#### FRONT-END DEVELOPER

Currently I'm working for Swiss Company as a Junior Frontend developer. I`m involved in several projects, such as corporate website, applications for time tracking and product catalog. Last two are made from scratch.

2022-RECENT

### MGM CONSULTING IT

#### FRONT-END DEVELOPER (part-time)

Part-time participation in web-development processes in IT company. Preparing, testing landing pages, helping with implementing new features.

2015-2021

### BLACKTHORN VISION

#### CFO

My main achievement in this role is that I have set up all financial processes and built a strong team of Accountants in dynamically growing Company, we have successfully passed annual tax audit and proved efficiency of our internal financial processes.

2012-2015

### NESTLE BUSINESS SERVICES EUROPE

#### AP ACCOUNTANT

This job taught me how to be a team player, I practiced my communication and co-operative skills with colleagues from other departments and countries. I learned how to implement new processes and continuously improve them (problem solving activities and daily operational reviews).
