PROFILE

Enthusiastic front-end developer eager to leverage my unique blend of professional experience and fervor for web development in a dynamic team environment with a frontend role. Over the last decade, my career progression from an Accountant to a Finance Director has equipped me with a rich skill set that I have adeptly utilized to accomplish my goals successfully.

Currently, I am expanding my skill set into the React ecosystem, having completed few training projects. I am keen to leverage my skills and learn in a dynamic team and seeking opportunities that will allow me to contribute and further develop my abilities in React-based projects.

I pride myself on being a responsible individual with a rapid learning curve and an exceptional eye for detail. I value open communication and thrive in environments that foster support and growth. My goal is to join a forward-thinking team where I can contribute to innovative projects, share my diverse experiences, and continue my development as a front-end developer.

PROJECTS

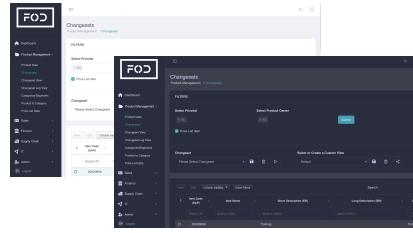

Corporate website

Time-tracking system

Product master catalog

EXPERIENCE

2022-RECENT

SCREENING EAGLE

FRONT-END DEVELOPER

Currently I'm working for Swiss Company as a Junior Frontend developer. I'm involved in several projects, such as corporate website, applications for time tracking and product catalog.
